

## Insurance

Students from participating countries within the Erasmus Mundus Scholarship programme are covered by the Europe Erasmus Mundus Insurance Scheme. The insurance is processed within the administrative procedures after the selection of students.

Students from countries outside the Erasmus Scholarship Scheme should be informed before their departure if their countries have any special agreement with Portugal, covering these issues. If there is no special agreement in this area, students should organise their own insurance and apply for the regular school insurance at IPT, that covers all possible accidents that occur at IPT's facilities, away from the campus (during formally organized curricular activities), whilst travelling to and from IPT, and at the official Residence). This school insurance requires the payment of approximately 5 euros.

Students from the European Union and the EEA Countries are covered by the Erasmus Health Insurance Card. To have this insurance protection, students should contact their own Social Security Office and ask for the Card, before their departure.
